

John Deere Operations Center

A set of online tools that provides information about your farm when you need it, where you need it

John Deere Operations Center

SEE what's happening in your operation right now, and learn from your performance over time.

- Use **Monitoring Tools** to see how your machines are performing and how jobs are progressing, even when you're not in the cab.
 - JDLink Connect-enabled Location History
 - Job Monitor
- On the **Summary Tab**, get a quick view of your entire operation's performance.
- With **Field Analyzer**, investigate what happened in a particular field.
- Organize and analyze information your way, in **Agronomic Reports**.

COLLABORATE with the right people and tools to make decisions that save time, optimize yield, and maximize profits.

- Easily share machine and agronomic data with others by setting **Permissions** that grant the right access to the right people.
- Keep one accurate view of your operation, with **Tools** you and your partners can use.
 - Field Detection
 - Post Calibration
 - Product Editing

DIRECT your operations by turning your plans into action, and adjusting as conditions change.

- Use **Prescription Creator** to customize plans for unique zones in your fields.
- Use **Jobs** to prioritize work and direct operators what to do next.
- Use **Setup Builder** to equip operators to get the work done right.
